Data Analyst – AI-Powered Analytics and Automation

Summary

Data Analyst with 2+ years automating manual business processes end to end. Built 9 production systems across Finance, HR, Sales, Supply Chain, Product Development and Market Intelligence, including cutting a 1-2 week compliance cycle to 10-20 minutes and indexing 400K+ product images for AI-based visual search. Core stack: Python, SQL, Flask, OpenAI, Qdrant, LangGraph.

Skills

Programming and Data: Python, SQL, VBA, Pandas, NumPy, PyTorch

AI and GenAI Systems: RAG, LangChain, LangGraph, LlamaIndex, OpenAI API, Gemini API, Ollama, Qdrant Vector Search, DINOv2, Embeddings, Prompt Engineering

App and Data Platforms: Flask, Streamlit, MS SQL Server, MySQL, Power BI, Excel, OpenPyXL, Google Apps Script

Automation and Tools: Playwright, OCR, PyMuPDF, OpenCV, APScheduler, Microsoft Graph API, Google Colab, Git

Experience

Data Analyst

Jul 2024 – Present

Jewelex India Pvt Ltd

Mumbai, India

- Cut a 1-2 week manual compliance cycle to 10-20 minutes for 500+ monthly records (approx. 99.7 percent faster) by automating document matching, merging, and compression
- Indexed 400K+ product images for AI-based visual similarity search, helping researchers avoid duplicate product development and speeding up product research
- Built 9 production AI and automation systems for Finance, HR, Sales, Supply Chain, Product Development, and Market Intelligence, replacing manual work across six functions
- Automated demand forecasting and inventory analysis by classifying SKUs into 5 demand-pattern segments and scoring forecast accuracy using WAPE/WMAPE

Projects

Enterprise Product Catalog Dashboard

Python, Flask, Excel, Git

- Built and maintain the flagship internal catalog dashboard covering grid/pivot views, price-slab filtering, and one-click PPT export, used as the team’s daily working tool across the full product catalog

GST/ICEGATE Compliance Automation

Python, Flask, PyMuPDF

- Cut a 1-2 week invoice-compliance cycle to 10-20 minutes (approx. 99.7 percent faster) for 500+ monthly records by automating PDF matching, merging, and portal-compliant compression

Sketch-to-Catalog Image Search

Python, PyTorch, DINOv2, Streamlit

- Enabled instant sketch-based search across 400K+ product images by building a DINOv2 embedding pipeline and Streamlit app that matches hand-drawn or CAD-style sketches to real product photos

RapNet Diamond Data Extractor

Python, Streamlit, Web Data Extraction

- Deployed a public Streamlit tool that structures diamond listing data from RapNet for faster downstream analysis, live at rapnetdiamonddataextractor.streamlit.app

Automated Market Research & Competitor Intelligence Agent Python, LangGraph, MS Graph API, Web Scraping

- Automated product research across multiple retail sources on a 4-hour cycle, cutting AI processing cost per item by 76 percent through a redesigned data-extraction pipeline

AI Product-Guideline Assistant (RAG)

Python, LlamaIndex, Qdrant, OpenAI

- Reduced manual document lookup to near zero by building a RAG chatbot with top-5 semantic retrieval and cited sources over indexed product-guideline workbooks

Demand Forecasting & Inventory Planning

Python, Flask, Pandas, SARIMA, ETS

- Replaced manual, inconsistent inventory calls with a repeatable process by classifying products across 6 demand-history buckets, auto-selecting a forecast model, and scoring accuracy using WAPE/WMAPE

Precious Metal Rate Capture Automation

Python, Playwright, Ollama

- Automated precious-metal price capture every 4 hours from screenshots using a local Ollama vision model, removing manual price checks for the Sales team

Education

Shri Ram Institute of Technology

Jul 2019 – Jun 2023

Bachelor of Technology, Electrical and Electronics Engineering

CGPA: 8.0/10.0

Certifications

IBM Data Analyst Professional Certificate – Coursera (2024) — PCAP: Programming Essentials in Python – Cisco (2022)
