Data Analyst | AI Automation | GenAI / RAG

Summary

Data Analyst and AI Automation Engineer with 2+ years of experience building analytics, forecasting, RAG, computer-vision, and workflow-automation systems. Skilled in Python, SQL, Flask, OpenAI, Qdrant, LangGraph, and LlamaIndex, with a track record of converting manual business processes into automated applications with measurable time and efficiency gains.

Skills

Programming & Data: Python, SQL, VBA, Pandas, NumPy, PyTorch

AI / GenAI Systems: RAG, LangChain, LangGraph, LlamaIndex, OpenAI & Gemini APIs, Qdrant Vector Search, Embeddings, Prompt Engineering, DINOv2

App & Data Platforms: Flask, Streamlit, MS SQL Server, MySQL, Power BI, Excel/OpenPyXL

Automation & Tools: Playwright, OCR, PyMuPDF, OpenCV, APScheduler, Microsoft Graph API, Git

Experience

Data Analyst

Jul 2024 – Present

Jewelex India Pvt Ltd

Mumbai, India

- Developed end-to-end analytics and AI automation applications for Supply Chain, Product Development, HR, and Market Intelligence teams, converting manual workflows into production Python/SQL-based applications
- Built demand-planning and inventory workflows across 6 demand-history buckets and frequency/variability segments, evaluating forecasting approaches with WAPE/WMAPE-based accuracy scoring
- Automated GST compliance processing for 500+ monthly invoice records, reducing a 1–2 week manual workflow to 10–20 minutes (~99.6–99.8% cycle-time reduction, ~40–80 person-hours saved per cycle)
- Delivered RAG, computer-vision, document-intelligence, and agentic research systems that replaced manual document and product search with automated retrieval across multiple business functions

Projects

GST Compliance Document Automation | *Python, Flask, PyMuPDF* — Validated, matched, merged, and compressed 500+ monthly invoice/ICE Gate documents into portal-compliant batches, cutting processing time from 1–2 weeks to 10–20 minutes (~99.6–99.8% reduction).

Jewellery Image Similarity Search | *Python, PyTorch, DINOv2, Qdrant* — Built an AI visual-search system indexing 400K+ jewellery images with multi-view embeddings and shape-fingerprint matching, enabling near-real-time SKU-level similarity retrieval and cutting manual catalogue search.

Newsletter Product Research Agent | *Python, LangGraph, MS Graph API* — Automated Outlook newsletter scanning every 4 hours with LangGraph fan-out for parallel processing; restructured LLM enrichment to use structured data first, cutting context from ~2,500 to ~600 tokens (~76% reduction).

PD Smart Assistant – RAG Chatbot | *Python, LlamaIndex, Qdrant, OpenAI* — Built a RAG chatbot over indexed product-guideline workbooks with top-5 semantic retrieval, source citations, and incremental indexing that skips unchanged files, replacing manual document search.

Demand Planning & Inventory Management | *Python, Flask, Pandas* — Classified SKUs across 6 demand-history buckets and frequency/variability segments, evaluating multiple forecasting approaches (SARIMA, ETS, Moving Average) via WAPE/WMAPE to support inventory decisions.

White Space & Competitive Intelligence Dashboard | *Python, Flask* — Built a multi-dimensional dashboard analyzing 10+ product and commercial attributes across retailers, with automated Excel/PowerPoint reporting for assortment-gap identification.

HR Onboarding Automation | *Python, Flask, OpenAI/Gemini Vision, MSSQL* — Automated the end-to-end onboarding workflow: AI-based document data extraction, validation, database sync, and auto-generated joining/statutory forms.

Metal Rate Extraction & Automation | *Python, Flask, Playwright, APScheduler* — Automated scheduled precious-metal price monitoring every 4 hours with AI-based rate extraction and auto-emailed Excel reports for the Sales team.

Education

Shri Ram Institute of Technology

Jul 2019 – Jun 2023

Bachelor of Technology, Electrical & Electronics Engineering

CGPA: 8.0/10.0

Certifications

IBM Data Analyst Professional Certificate – Coursera (2024) | PCAP: Programming Essentials in Python – Cisco (2022)
